Pier Paderni believes that the purpose of art is the creation of a magical universe. All of us have the innate ability to nourish the flowering of the magic within us.

His paintings are 'fragments' inspired by the legend of Andromeda. A long time ago, in the system of Shirach, the magic spaceship *Andromeda* disappeared in a black star. *Andromeda* was the most fascinating and fast flagship of the universe—a wonder of technical perfection and beauty. The inside walls of that spaceship, made of special glass, were decorated with immense paintings representing enchanted sceneries from the most beautiful provinces of the universe... a mammoth art gallery travelling in the far distant systems and galaxies casting a unique spell.
